CONTENTS
Volume 42 (1989)

On Opinion 1–13
by S.C. Leung and Y.L. Cheung (Kowloon, Hong, Kong)
A comparative law analysis of the standard for admitting scientific evidence: the United States stands alone 15–31
by E.J. Imwinkelried (Davis, CA)
Cyanide, carboxyhemoglobin and blood acid-base state in animals exposed to combustion products of various combinations of acrylic fiber and gauze 33–41
by M. Okae, K. Yamamoto, Y. Yamamoto and Y. Fukui (Kyoto, Japan)
Non-equilibrium pH gradient electrophoresis (NEPHGE) on ultrathin polyacrylamide gels containing separators: Improved erythrocyte phosphoglucomutase (PGM_1) and esterase D (EsD) diagnosis in red cell lysates and bloodstains 43–50
by G. Destro-Bisol and A. Spinella (Rome, Italy)
Experimental evaluation of the distribution of the pellets in shotgun pellet patterns ... 51–59
by D.A. Boyer, L.D. Marshall, L.M. Trzicak and W.F. Rowe (Washington, DC)
Diagnosis of pregnancy in bloodstains. Study of progesterone and luteinizing hormone levels 61–68
by E. Osuna, J.I. Osuna and A. Luna (Murcia and Granada, Spain)
Application of 3-D computer graphics for facial reconstruction and comparison with sculpting techniques 69–84
by P. Vanezis, R.W. Blowes, A.D. Linney, A.C. Tan, R. Richards and R. Neave (London and Manchester, U.K.)
Inflammation in the lungs of infants dying suddenly. A comparative study from two countries 85–94
by E. Lignitz and J. Hirvonen (Berlin, G.D.R and Oulu, Finland)
Blood alcohol in sudden and unexpected deaths 95–102
by A. Penttilä, P.J. Karhunen and E. Vuori (Helsinki, Finland)
The evaluation of an ELISA for semen-specific 19-OH prostaglandin $F_1\alpha/F_2\alpha$ using casework swabs and stains 103–123
by S.J. King, D.J. Werrett and D.T. Harrison (Reading and Chorley, U.K.)
The mechanism of fatal cardiopulmonary injury caused by a blow from a golf club 125–130
by B. Purdue and G.C.A. Fernando (Dundee, Scotland)
A method of human diaphorase locus 3 phenotyping in human semen by isoelectric focusing 131–134
by R. Pawlowski (Gdansk, Poland)
Detection of injuries in traumatic deaths. The significance of medico-legal autopsy 135–143
by S.B. Albreksten and J.L. Thomsen (Copenhagen, Denmark)
Sudden death from asthma 145–150
by I. Morild and J.C. Giertsen (Bergen, Norway)
Injuries due to deliberate violence in areas of Argentina. I. The extent of violence 151–163
by O. Aalund, L. Danielsen, E. Katz and P.H. Mazza (Copenhagen, Denmark)
Injuries due to deliberate violence in areas of Argentina. II. Lesions 165–175
by L. Danielsen, O. Aalund, P.H. Mazza and E. Katz (Copenhagen, Denmark)

Book Reviews 177–178
Diary of Future Events 179–182
Synthetic reductions in clandestine amphetamine and methamphetamine laboratories: a review 183–199
by A. Allen and T.S. Cantrell (Ashtabula, OH and Washington, DC)
Vitreous potassium as a measure of the postmortem interval: an historical review and critical evaluation 201–213
by J.I. Coe (Minneapolis, MN)
Studies on asphyxia: lipids in the alveoli of rats in hypoxic state 215–220
by H. Takahashi, Y. Kuroki, M. Morita and N. Tabata (Sapporo, Japan)
Identification of unknown human remains by comparison of antemortem and postmortem radiographs 221–230
by N.G. Jablonski and B.S.F. Shum (Kowloon, Hong Kong)
A new colorimetric determination of diquat produced with several moderate reductants 231–237
by K. Minakata, O. Suzuki and M. Asano (Hamamatsu, Japan)
A comparison study of the handwriting of adolescents 239–248
by C.T. Cusack and J.W. Hargett (Boston, MA and Washington, DC)
Mandibular canine index — a clue for establishing sex identity 249–254
by N.G. Rao, N.N. Rao, M.L. Pai and M.S. Kotian (Mangalore, India)
Thin-layer chromatographic analysis of Indian stamp pad inks 255–262
by O.P. Jasuja, A.K. Singla and B.L. Seema (Patiala, India)
Fatal and non-fatal methomyl intoxication in an attempted double suicide 263–270
by T. Miyazaki, M. Yashiki, T. Kojima, F. Chikasue, A. Ochiai and Y. Hidani (Hiroshima and Numakuma-gun, Japan)
Dispersion of firing discharge residues using a Maxwellian model 271–277
by C.N. Bhattacharyya (Chandigarh, India)
The BF F subtypes are detectable in the Ba fragment of factor B 279–286
by I. Siemens, K. Bender, G. Geserick, G. Mauff and F. Pulverer (Koln, Freibrug and Berlin, F.R.G.)
Diary of Future Events 287–290
